

Services

We are not a “ZENO of all trades”. We specialize in Non-Ferrous Metal recycling. We focus on Scrap Aluminum 6063, Aluminium Engine blocks and Copper/ Copper cathode only. We purchase Aluminum scrap in any form and transform the scrap into high quality Aluminum Ingots for sale. We also purchase all forms of copper scrap but we are mostly interested in Copper Wire Scrap. After buying copper wire scrap, we process and make ready for exportation. Although we buy scrap only locally, the finished products from our factories- Aluminum Ingots and Copper Wire Scrap are sold mostly through export to international buyers. We have satisfied clients in 131 countries and counting.

ZENO'S goal is to provide quality products at competitive prices, and establish long-term business partnerships with our customers based on honest cooperation. We are confident that we can provide you with the best quality at a competitive price on the market.

Thank you for sparing your time to read our message. For any questions or queries, please feel free to contact us at zenosystemsindia@gmail.com or What's App +91 9447024128 .We look forward to the possibility of building a long-term business relationship with you.
